

## Propagation and maintenance of viral pathogens of shrimp, prawn and fish:

### List of viral pathogens of shrimp, prawn and fish available in DBT-Funded National Repository of viral pathogens of aquatic animals

<b>Shrimp viral pathogens</b>	White spot syndrome virus (WSSV) (New and old stains of WSSV isolated from different states along coastal line of India.
	Infectious hypodermal and haematopoietic necrosis virus (IHHNV),
	Monodon baculovirus (MBV)
	Hepatopancreatic parvo-like virus (HPV)
	Infectious myonecrosis virus (IMNV)
<b>Viral pathogens of prawn</b>	<i>Macrobrachium rosenbergii</i> nodavirus ( <i>MrNV</i> )
	Extra small virus (XSV)
<b>Viral pathogens of fish</b>	Betanodavirus (FNV)
	Tilapia Lake Virus (TiLV)
	Cyprinid Herpes Virus 2 (CyHV-2)
	Cyprinid Herpes Virus 3 (CyHV-3)
	Carp Edema Virus (CEV)
<b>Plasmids bearing partial genome of viral pathogens of shrimp</b>	Yellow head virus (YHV)
	Taura Syndrome Virus
	Gill associated virus (GAV)
<b>Plasmids bearing partial genome of viral pathogens of fish</b>	Snakehead rhabdovirus (SHRV)
	Viral hemorrhagic septicemia virus (VHSV)
	Infectious pancreatic necrosis virus (IPNV)
	Infectious hematopoietic necrosis virus (IHHNV)
	Spring viraemia carp virus (SVCV)
